

Full-Time Clinical Rater at Washington University in St. Louis

We are seeking a full-time professional clinical rater for an NIH-funded R01 project supervised by Drs. Renee Thompson and Tammy English (Co-PIs) along with Dr. Todd Braver (Co-I) in the Department of Psychological and Brain Sciences at Washington University in St. Louis. The project (R01AG070139) examines the role of motivation and depressive psychopathology in age-related changes in emotion and emotion regulation across adulthood. It utilizes a multi-method approach, including clinical interviews, neuroimaging, experience sampling, behavioral measures, and psychophysiological assessment.

This position will expose the individual to a wide array of theories and methods in clinical science, affective science, and neuroscience, providing a unique opportunity to develop research skills and engage in professional development with a large, collaborative team. It would be a good fit for a hard-working, detail-oriented, and highly motivated bachelors- or masters-level individual. The start date is negotiable in summer 2022.

Core Responsibilities

This position will focus on recruiting and assessing the mental health status of adults (ages 35-75) from the community to determine eligibility for the study, including the following:

- Recruit, screen, and schedule community members from diverse backgrounds and ages
- Administer structured clinical interviews (e.g., Structured Clinical Interview for DSM-5 (SCID))
- Code recorded clinical interviews for quality control and establishing inter-rater reliability
- Participate in the training and supervision of other team members
- Complete miscellaneous administrative duties
- Conduct basic analyses and assist with database management

Minimum Requirements: Bachelor's degree in psychology, social work, or a related field, diagnostic interviewing experience, good communication and organization skills, works well in a team and independently

Preferred Qualifications: Some graduate schooling or master's degree in psychology, social work, counseling, or related field; experience with the SCID; up to three years of relevant research and/or clinical experience, such as experience working with adult clinical samples

How to Apply

To apply for this position, please navigate to <https://jobs.wustl.edu/> and search for job number JR66857. Interested applicants should also email their CV listing three references as well as a 1-page cover letter describing their interest in the position and relevant expertise to Drs. Renee Thompson (renee.thompson@wustl.edu) and Tammy English (tenglish@wustl.edu).

Applications will be reviewed on a rolling basis until the position is filled.

Our labs are committed to diversity, equity, and inclusion. We strongly encourage applications from candidates who are committed to contributing to this goal in addition to applicants from groups historically underrepresented in STEM.
